

## BEFORE UNPACKING

Have several vases and/or containers ready with clean water.

## UNPACKING THE BOX

Remove the protective lid on the top of the box by firmly pulling the straps. Take out tray 1 and put it away.

Then, take out trays 2 and 3 and put them on a table.

**Do not expose your flowers to extreme temperatures and direct sunlight at any time.** Ideal temperature: 55F - 65F.

## REMOVING THE BOUQUETS

Unfasten the velcro straps with one hand while holding the bouquet with the other. Hold the arrangement and take off the paper, rubber band, plastic bag and foam. **Do not remove the tags before your wedding day.** Place the bouquet in a vase with about 2-3 inches of clean water. Repeat this process with all the bouquets. **Do not let the heads of your flowers hit anything!**

## REMOVING BOUTONNIERES AND CORSAGES

Take tray 1. Cut the plastic strap that holds the arrangement. Then remove the ribbon and the plastic cover. Hold the water tube and gently remove the stems along with the rubber cap, then remove the foam and cap. Be sure to hold the arrangement from the stems and never from the flower. Place all boutonnieres and corsages in containers with about 2 inches of clean water.
